SOURCE [REDACTED]

1. Bratislava-Ivanka (P 49/Y 09) airfield, about 2,000 x 2,300 meters, was surrounded by fields. There was a spur track and a graded runway. The runway was about 100 x 1,500 to 1,700 meters and not concreted. Two runways, 80 x 800 meters each, branched off from the main runway.
2. New buildings observed at the field included two hangars, each 70 meters square, one hangar, 30 x 70 meters, a two-story building, probably the flight control, an occupied house, and barracks buildings for laborers. A large construction material dump and piles of bricks observed at the field indicated that construction was still in progress there. No enlargement was observed. The runway was under construction and some buildings were completed. The field was not in operation. There were no soldiers or aircraft at the field. \*

25X1A

[REDACTED] Comment. The report indicates that the airfield was still under construction in June 1951. According to previous information, the field is to be completed in 1951 as a new civilian airfield for Bratislava. Previous reports did not furnish a clear picture as to the location of the runways, their lengths, and status of concreting.
